

# Plant Connect

**Production Data  
Anywhere.**

# Plant Connect

## Monitor Data via the Internet

The Plant Connect system allows scale production data to be **monitored remotely** over the Internet.

## Subscription Service

Plant Connect is a subscription service so there are **no upfront software or hardware costs**. Single point of contact for full support on hardware, software, and Internet connectivity (*including cellular connections*).

## Internet Data Storage

Plant Connect is entirely Internet based. **No local PC is required**. Scale data is automatically sent to a secure server via broadband or cellular internet connection.

## Secure Access to Information from Anywhere

Plant Connect data is accessed from any **Internet web browser**. The system is compatible with iPhone, iPad, Android and other internet capable handheld devices.

A **secure** username and password is required for access to the data.

## Critical Production Reports

The reports allow the user to **quickly** correct inefficient production and keep track of inventory levels to properly meet market demands.

# Production Data Anywhere.

## Production Monitoring and Reports

- Securely Monitor Scale Data via the Internet.
- Easily Access Production Reports from Anywhere.
- Select Time Periods to View.
- Define Production Limits for Statistical Analysis.
- Export Charts in PDF Format.
- Track Start / End Times.
- Track Equipment Efficiency and Abuse.
- Track Down Time.
- Track Inventory Levels.
- Track Black Belt Time.
